

SafeTrends™ from American Megatrends is a breakthrough standalone Continuous Data Protection software suite for Windows® environments that offers complete protection of your important digital media. SafeTrends safeguards your digital life by giving you the flexibility to choose what to save, and when and where to save it with options for Local, Remote and Storage Cloud (Internet) backups, and via email. SafeTrends also allows you to specify how many versions of a specific file or folder to save, and features an Event Log that allows you to review activity and fine tune performance.

Data sheet

PRODUCT HIGHLIGHTS

- Industry leading Continuous Data Protection software for the Windows® environment
- Simple and easy to use wizard-driven GUI
- Effective monitoring and protection of data locally, over an Intranet, home network or Internet
- Protection via email
- Protection on Storage Clouds
- Protection in removable media (USB)"
- Extensive status monitoring and progress display
- Secure safekeeping of data
- Most space and network efficient solution

Features

SafeTrends™ Backup and Restore Software with Continuous Data Protection (CDP) for Windows® environments

Product Highlights:

- Continuous monitoring and protection of files and folders
- Built on extensible architecture using state-of-the-art technology
- Offers protection against logical data errors and physical disasters
- Easy to use GUI for configuration and monitoring
- Hassle free operation without any administrative help.
- Elegant and easy to use Wizard for Digital Data Protection
- Fine control over protected file set through extensive filters
- Supports protection in separate Local Folders
- Support for Quota and Versioning
- Extensive Data Reduction features
- Supports secure transfers using data encryption
- Scheduled and continuous remote backup
- Supports protection in Peer and Home Networks

- Supports Protection and backup on File Shares
- Retains Access Rights.
- No installation required on remote systems
- Supports Internet Backup using Email
- Built-in integration with Storage Cloud
- Extensive Recovery Wizard allows guided recovery
- Allows concurrent protection and recovery tasks
- Event logging and alert management
- Detailed status and progress monitoring

Protection Features:

- Continuous protection of Files and Folders on any Windows system
- Supports up to four separate protection tasks
- Supports up to four monitoring locations (folders and sub-folders) per task
- Extensive selection criteria using File Filters
- Supports protection in Local Folders for fast recovery from logical errors
- Continuous and Trickle protection over the Intranet File Shares
- Continuous and Trickle protection over Peer and Home Network

Features

- Supports Secure transfer and storage using data encryption
- Elegant data reduction technology utilized for saving transfer time and optimizing storage requirements.
- Data Compression and fine-grained De duplication
- Works even when network link is down
- Protecting Digital contents over the Internet using Email
- Supports splitting of large files for email
- Built-in integration with Storage Cloud and Amazon Simple Storage Services (S3)
- Allows pausing and restarting of protection tasks.
- Easy to use Protection Wizard for guided protection configuration

Recovery Features:

- Offers integrated tool for recovering one or more files and any version
- Simple Recovery Wizard for quick guided recovery offering fast Recovery Time Objective (RTO)
- Supports fast recovery from Local folder
- Recovery from remote shares and Peer/Home Network
- Extensive status and progress display
- Recovery tool for email recovery
- Built-in recovery from Storage cloud and Amazon S3
- Continuous Data Protection even during recovery action
- Restores digital contents and access control information

Events, Alerts and Monitoring Tools:

- Every important event is time stamped and logged
- Integrated Event viewer allows easy access and display of events
- Graphical tools allows detailed display of protection statistics
- Separate Progress indicators for Protection and Restore operations.
